### Modbus and Character mode serial link

#### Description

The Modicon M340 platform offers two serial link connection options for Modbus or Character mode.

BMX P34 2010/20102

BMX P34 1000/2000  
BMX P34 2020

#### Link integrated in the processor

**BMX P34 1000/2000/2010/20102/2020** processors integrate a serial link which can be used with either the Modbus RTU/ASCII master/slave protocol or with the Character mode protocol.

The following front panel features relate to this serial port on these processors:

- 1 A display block including at least the following LEDs:
  - SER COM LED (yellow): Activity on the serial link (lit) or fault on a device present on the serial link (flashing)
- 2 An RJ45 connector for Modbus serial link or Character mode link (non-isolated RS 232C/RS 485) with its black indicator
- 3 An RJ45 connector for Ethernet Modbus/TCP port with its black indicator (**BMX P34 2020** processors only)

**Note:** For more information about the processors, see page 1/5.

BMX NOM 0200

#### BMX NOM 0200 serial link module

The **BMX NOM 0200** module front panel comprises:

- 1 Safety screw for locking the module in a slot in the rack
- 2 A display block with 4 LEDs:
  - RUN (green) and ERR (red): Module status
  - For each of the two channels: SER COM (green): Activity on the serial link (lit) or fault on a device present on the serial link (flashing).
- 3 Two RJ45 connectors (exclusive use) with their black indicator for connecting channel 0 with:
  - 3a A connector for RS 232C connection, marked COM Port 0 RS232
  - 3b A connector for RS 485 connection, marked COM Port 0 RS485
- 4 An RJ45 connector with its black indicator for RS 485 connection of channel 1, marked COM Port 1 RS485

#### To be ordered separately:

RS 485 cordsets (see page 3/52) or RS 232 cordsets for DCE terminal (see page 3/51).

### Modbus and Character mode serial link

3

#### Characteristics of the integrated link in the processor

Protocol		Modbus		Character mode	
Structure	Physical interface	RS 232, 4-wire	RS 485, 2-wire	RS 232, 4-wire	RS 485, 2-wire
	Type	Non-isolated serial link (1)			
	Access method	Master/slave type, switchable online		–	
	Peripheral power supply	–	Provides a 5 V $\pm$ /190 mA power supply	–	Provides a 5 V $\pm$ /190 mA power supply
	Connection	RJ45 female connector			
Transmission	Mode	Asynchronous in baseband		Asynchronous in baseband	
	Frame	RTU/ASCII, Half duplex		Full duplex	Half duplex
	Data rate	0.3...38.4 Kbps (19.2 Kbps by default)		0.3...38.4 Kbps (19.2 Kbps by default)	
	Medium	Shielded twisted pair		Single or double shielded twisted pair	Shielded twisted pair
Configuration	Number of devices	2 (point-to-point)	Up to 32 per segment	2 (point-to-point)	Up to 32 per segment
	Maximum number of link addresses	248		248	
	Maximum length of bus	15 m	10 m non-isolated link 1000 m isolated link (1)	15 m	10 m non-isolated link 1000 m isolated link (1)
	Maximum length of a tap link	–	15 m non-isolated link 40 m isolated link (1)	–	15 m non-isolated link 40 m isolated link (1)
Services	Frame	252 bytes of data per RTU request 504 characters per ASCII request		1 KB of data per request	
	Safety, check parameter	One CRC on each frame (RTU) One LRC on each frame (ASCII)		One LRC on each frame (ASCII)	
	Monitoring	Diagnostics counters, event counters		–	

#### Characteristics of the BMX NOM 0200 serial link module

Protocol		Modbus		Character mode	
Module channels		COM Port 0	COM Port 0 and Port 1	COM Port 0	COM Port 0 and Port 1
Structure	Physical interface	RS 232, 8-wire (2)	RS 485, 2-wire	RS 232, 8-wire (2)	RS 485, 2-wire
	Serial link type	Non-isolated	Isolated	Non-isolated	Isolated
	Access method	Master/slave type, switchable online		–	
	Peripheral power supply	–		–	
	Connection	RJ45 female connector	Two female RJ45 connectors	RJ45 female connector	Two female RJ45 connectors
Transmission	Mode	Asynchronous in baseband			
	Frame	RTU/ASCII, Full duplex	RTU/ASCII, Half duplex	Full duplex	Half duplex
	Data rate	0.3...115.2 Kbps	0.3...57.6 Kbps	0.3...115.2 Kbps	0.3...57.6 Kbps
	Medium	Shielded twisted pairs	Shielded twisted pair	Shielded twisted pairs	Shielded twisted pair
	Line polarization	–	Automatic	–	Configurable with Unity Pro software
Configuration	Number of devices	2 (point-to-point)	Up to 32 per segment	2 (point-to-point)	Up to 32 per segment
	Maximum number of link addresses	248		248	
	Maximum length of bus	15 m	1000 m	15 m	1000 m
	Maximum length of a tap link	–	40 m isolated link	–	40 m isolated link
Services	Frame	252 bytes of data per RTU request 504 characters per ASCII request		1 KB of data per request	
	Safety, check parameter	One CRC on each frame (RTU) One LRC on each frame (ASCII)		One LRC on each frame (ASCII)	
	Monitoring	Diagnostics counters, event counters		–	

(1) For an isolated link, the **TWD XCA ISO** isolation box must be used.

(2) Manages the RXD, TXD, TRS, DTR, DSR, CTS and DCD signals; does not manage the RI signal.

### Modbus and Character mode serial link

#### Modbus functions

Code	Functions	Modbus slave (server)	Modbus master (client)
01	Read output bits	Yes	Yes
02	Read input bits	Yes	Yes
03	Read output words	Yes	Yes
04	Read input words	Yes	Yes
05	Force 1 output bit	Yes	—
06	Preset 1 output word	Yes	—
08	Diagnostics	Yes	—
0F	Write n output bits	Yes	—
10	Write n output words	Yes	—
15	Force n output bits	—	Yes
16	Preset n output words	Yes	Yes
17	Read/write n output words	Yes	—
2B/0D	Access CANopen object dictionary	Yes	—
2B/OE	Read slave identification	Yes	—
Other code	Access any Modbus function using the [DATA_EXCHG] DFB user function block (1)	—	Yes

(1) The [DATA\_EXCHG] DFB user function block can also be used to send Modbus/TCP requests on the Ethernet network.
